

National Retail
Association

This course is a joint initiative of StanCert and the National Retail Association see www.stancert.com and www.nra.net.au for more information on the two organisations.

Intermediate product risk assessment training

Course reference: SCPSRA02

This practical and focused course is aimed at assisting you to carry out effective and efficient product risk assessments through hands-on case studies. Managing product risk better than your competitors offers a key marketing differentiator that will increase the value of your brand. It also reduces costs and product development cycles leading to a significant and sustainable competitive advantage. It may also reduce the likelihood of costly product recalls.

Introduction to product safety and compliance

Course Description...

Risk assessment training provides information on how risk assessment strategies can be applied to a product development process.

Participants are taught through practical, real life examples, which not only improve learning but facilitate the application of risk assessment techniques.

All risk assessment training courses can be customised to meet the specific needs of your company and staff to ensure the best learning environment.

Learning Objectives...

The overall goal of this intermediate product risk assessment training is to provide mid-level exposure to the risk assessment safety process and hands-on and practical training, resulting in a broad understanding of key product safety issues.

Who should attend...

This training is intended for product buyers, senior managers, risk managers, compliance managers, quality managers, creative designers, engineers, production managers, technologists, selectors, importers, exporters, regulators and internal auditors.

Prerequisites...

Participants should complete the Introduction to product safety and compliance course (SCPRA01) before attending this course. Alternatively, they should have a minimum of 6 months' product safety and compliance experience and have completed the course pre-reading material.

Your Trainer

Mark Bezzina, StanCert Managing Director, is passionate about product safety and he is highly regarded as one of Australia's most influential and progressive thought leaders in this critical area.

Mark has advised governments in the ASEAN and APEC regions on product safety and risk assessment and is currently helping establish a consumer protection and product safety regulatory function in Abu Dhabi (United Arab Emirates).

Through his company, StanCert, Mark has carried out risk assessments for Australian regulators and reviewed compliance requirements for many high profile organisations and Government departments.

He is the Chair of the Australian Standards Committee on Product Safety and the Australian Head of Delegation to ISO PC 243 on Product Safety and compliance.

Course Outline...

Participants will be guided through the following topic areas:

- ✓ Review of risk assessment methodologies used throughout the world
- ✓ An overview of ISO 31000 Risk Management as it applies to product safety risk assessment
- ✓ Risk assessing suppliers
- ✓ A detailed and focused explanation of the world's leading and most authoritative product safety risk assessment tool – the European Commission's Risk Assessment Guidelines embedded in the RAPEX System
- ✓ Common products and risks (case studies of what went wrong and why)
- ✓ Test methods
- ✓ Practical hands-on product risk assessment exercise to enable group learning and experience sharing
- ✓ Where to go for more information or to identify key product risks

Course logistics...

The course will be offered in Sydney, Melbourne, Brisbane and Canberra.

Morning tea, afternoon tea and lunch will be provided.
